ABOUT ME

My journey is defined by the seamless fusion of my passion for linguistic expression and the burgeoning curiosity to unravel the intricacies of coding. Despite being an absolute beginner in programming, I am driven by an insatiable curiosity and a burning passion to master the languages that power the digital landscape.

Armed with a degree in literature, I have spent years immersed in the rich tapestry of human expression through words. My understanding of the nuances of language, syntax, and narrative structures serves as a unique foundation for my foray into the world of programming. I see the parallels between my literary background and the syntax of coding as a way to build bridges between two seemingly disparate worlds.

PROJECTS

[12/06/2023 – 03/07/2023] **Weather app**

I conceptualized, designed, and implemented my first landing page, showcasing my proficiency in HTML, CSS, and JavaScript. The project features a responsive design, dynamic elements powered by JavaScript, and an aesthetic layout achieved through CSS styling. This hands-on experience allowed me to integrate various elements, ensuring a seamless and interactive user experience.

This project served as a valuable learning experience, allowing me to apply theoretical knowledge in a practical setting. It deepened my understanding of front-end technologies and honed my skills in crafting visually appealing and functional web interfaces. I am eager to delve into more complex projects, exploring advanced JavaScript frameworks and further refining my design sensibilities.
